Mr. Gary Vogt
Environmental Chemical Industries
1413 Leone Street
Dothan, Al 36303

Dear Mr. Vogt:

This letter is to let you know we are pleased with the results from your product, SEBS. We have been using SEBS in our treatment system that handles grease trap and septic tank pumpage since 10-20-97 at the Omussee Creek WWTP. SEBS has virtually eliminated the strong odor produced in this system and has greatly improved settling, which means we don't have to pull a drying bed as often. We have been adding about one quart per day to a 200,000 gallon tank that receives septage and grease trap pumpage daily. We have also noticed a reduction in floating grease accumulations.

Sincerely,

A handwritten signature in cursive script that reads "Donald K. Hallford".

Donald K. Hallford
Wastewater Treatment Supervisor
